REVOLUTIONIZING HOUSEKEEPING MANAGEMENT

Workplace Safety

For Facility / Maintenance Managers

Identifying and Mitigating Risks to Ensure a Safe Working Environment

1. Always know where your employees are in the building or workspace

2. Ensure that good security measures are posted, followed and enforced

3. Provide a violence-free work environment

4. Train employees on emergency protocols

5. Always equip employees with "Best Practices" ongoing safety education

6. Provide personal protective equipment for employees that may be exposed to toxic chemicals or other hazards
